DESIGN SUMMARY

The proposed design for the renovation of the Buckhead Library located at 269 Buckhead Ave. NE, Atlanta, GA provides space for all patrons. The existing library is a single story space containing a net floor area of approximately 19016 sq.ft. The building exterior skin and entrance canopy will both receive much needed repairs. The renovation includes finish upgrades to all areas of the library. Upon entering the library lobby, a space for Friends of the Library book donations and an information monitor will greet patrons. Two new accessible restrooms will be added off of the lobby to the immediate right. Included in this design is a new secondary meeting space for voting, book sales, art shows, and other events hosted by the library. Also included, for smaller meetings, are 4 study rooms near the computer stations for patron’s usage. In an effort to streamline the “checking out” process, this design includes a total of three new self-check machines located in various areas of the library. A new dedicated story time space with access to a sink and family restroom will also be added to the children’s area. A high-tech study space for teens is also included.
LIBRARY IMPROVEMENTS

- Four state of the art study rooms
- 2 New ADA compliant restrooms
- LED lighting
- New technology package
- Finish upgrades

- Three self-check stations
- Secondary meeting room
- New furniture and equipment
- New roof and exterior canopy repairs
