The proposed design for the renovation of the Mechanicsville library located at 400 Formwalt St SW, Atlanta, GA, provides space for all patrons. The existing library is a two story space containing a net floor area of approximately 8,578 sq.ft. All of the existing exterior walls of the library will remain intact and undisturbed. The renovation includes new finish upgrades to the women's and men's restrooms and meeting room on the lower level. The new circulation desk will be centrally located in the space for better staff visibility and accessibility to serve patrons. This design also includes two new study rooms that come equipped with study tables, chairs, and a TV monitor for patron usage. Upgrades for adult’s, teen’s, and children’s areas are also included. The new study rooms will be located straight ahead, and behind the circulation desk upon entering the library. The adult’s and teen’s areas will be to the left upon entering the library and the children’s area will be located to the right. All adult’s, teen’s, and children’s areas have their own designated computer stations. Also, to streamline the “checking out” process, this design includes two new self-check stations and a print release station.
LIBRARY IMPROVEMENTS

- Two state of the art study rooms
- New ADA compliant restrooms
- LED lighting
- New technology package
- Finish upgrades
- Two self-check stations
- Print Release station
- New furniture and equipment
- New book drop location
- A new accessible route from the parking area
