The proposed design for the renovation of the Dr. Robert E. Fulton at Ocee Library located at 5090 Abbotts Bridge Road, Johns Creek, GA provides space for all patrons. The existing library is a single story space containing a net floor area of approximately 23,700 sq. ft. The renovation includes finish upgrades to all areas of the library. Upon entering the library lobby, a space for Friends of the Library book donations and an information monitor will greet patrons. The building entrance lobby will receive exciting updates to provide a space for engaging in a small cafe area. New to the library is an additional meeting room that seats up to 38 patrons. Also, included in this design are four new study rooms for small collaboration meetings. The children’s area includes tons of fun seating and an area dedicated for story time and crafts. Upgrades also include a new teen’s area with dedicated computer stations and soft seating for comfortable reading. In an effort to streamline the “checking out” process, this design includes four new self-check machines and printing services that are conveniently located within the new library design. This project is pursuing LEED Silver certification.
LIBRARY IMPROVEMENTS

- Four state-of-the-art study rooms
- New ADA compliant restrooms
- LED lighting
- New technology package
- Four self-checkout stations
- Finish upgrades to the meeting room
- New furniture and equipment
- Exterior walls and roof repairs
- Dedicated storage and sales area for Friends of the Library

PROPOSED FLOOR PLAN

LEGEND
- Adult's Area
- Teen's Area
- Children's Area
- Meeting Spaces
- Staff Area
